

LABORATORIOS FARMACÉUTICOS ROVI S.A. ENERGY POLICY. GRANADA PLANT

Laboratorios Farmacéuticos ROVI S.A. is committed to a responsible use of energy in its production of active ingredients and research and development into medicine and other health products in order to reduce greenhouse gases and other negative impacts on the environment, as outlined in the "Policy against climate change" from the ROVI group.

Energy consumption, as part of the production process at Laboratorios Farmacéuticos ROVI in Granada, constitutes one of links necessary to undertake its activity.

The acquisition of energy efficient products and services, designing and improving the energy performance and an energy management system based on the Plan-Do-Verify-Act (PDVA) continual improvement cycle, form part of our regular practices in the organization.

In addition, promoting a correct usage and consumption of energy and sharing these principles across all levels and with all employees, by means of continual training and awareness-raising, is part of our company culture.

All staff at Laboratorios Farmacéuticos ROVI S.A. in Granada, are aware of the environmental benefits of implementing an efficient energy management system and we are committed to:

- Working towards the continual improvement of the energy performance, establishing energetic goals and objectives.
- Ensuring that the information and resources needed to carry out these goals is accessible to all.
- Meeting the legal requirements and any other requirements at ROVI Pharmaceutical Laboratories S.A. related to the use and consumption of energy and energetic efficiency.
- Providing an adequate frame of reference in order to establish and revise specific results and achievements needed to fulfill energy policy and the detailed and quantifiable requirements of the energy performance.
- Supporting the purchase of energy efficient products and industrial designs to improve energy performance
- Documenting, communicating, revising and updating the current policy if necessary
- Working towards the continual improvement of the Energy Management System

This policy therefore constitutes the firm commitment of Laboratorios Farmacéuticos ROVI S.A. to the correct use of energetic resources and states our principles regarding energetic efficiency, promoting a responsible use of energy.
